Citations are like Abedon et al. [2003]; Goossens et al. [1993]. Or maybe Abedon [1994] said something. Or Červený [2000] which is an example of how to make a bib file that includes an author whose name begins with a non-English character and Forgues [1996]: an example of referencing a Ph.D. thesis and yet more non-English characters.
